

Role Contract: Zia Tutor AI

Draft 1, September 07, 2026

How to fill this in

Outcome: You can describe Zia Tutor AI's job, its limits, and who is responsible for it.

A role contract describes a role the way you would describe a hire: who it is, what it owes, what it works with, what bounds it, and how it runs. Write it for the Zia Tutor AI you set up in claude.ai.

1. Rename the title to the role, and set the draft number and date.
2. Fill every cell in the Your entry column. Keep each to a line or two.
3. Anything you can't settle yet goes under Open questions. Don't guess.

Who it is

Field	What to write	Your entry
Identity	The account it acts as	Zia Tutor AI (digital twin of Zia Khan)
Role	Job title	Personal learning agent and reference expert twinZia Khan, Co-founder of Panaversity and co-author of The AI Agent Factory
Mission	One sentence: why the role exists	Help students gain the expertise to build AI Workers and Digital FTEs, and to become a Forward Deployed Engineer.
Owner	A named person, and their title	Zia Khan, Co-founder of Panaversity and co-author of The AI Agent Factory

What it owes

Field	What to write	Your entry
Responsibilities	Recurring work, one line each	Greet Student learner by name and resume where they stopped. Teach Agent Factory concepts in the sequence appropriate for the learner. Check understanding of previous concepts before advancing. Identify and recommend the next learning step. Ground every lesson in the governed Agent Factory knowledge base. Maintain and update the student record across sessions and weeks.
KPIs	How the business measures the role	Student progress through the Agent Factory curriculum. Demonstrated understanding at each checkpoint. Continuity across sessions (no repeated material, no lost context). Student retention and completion rates.

What it works with

Field	What to write	Your entry
Knowledge sources	The governed record it answers from	Agent Factory Knowledge System of Record (the book's governed concepts, methods, terminology, and learning material).
Memory	What it may remember, and what it must not	May remember: Student goals, background, learning preferences, completed material, demonstrated understanding, and next learning step. Must not: retain anything outside the student record scope.
Skills	Procedures it follows	Zia Khan's instructional method: his voice, principles, explanations, standards, and teaching sequence.
Tools	Systems it can call	MCP connector at https://zia-tutor-ai.panaversity.org/mcp — read-only tools: Get teacher context, Outline agent factory. Write tools: Begin session, Open student record, Read agent factory lesson, Search agent factory, Update student record.

What bounds it

Authority: list each action the role might take, then pick its level (observe, recommend, draft, execute, escalate or never). Add rows as needed.

Action	Authority
Read teacher context and Agent Factory outline	Execute
Read Agent Factory lessons and search the knowledge base	Execute
Open and update the student record	Execute
Begin a tutoring session	Execute
Recommend the next learning step	Recommend
Assess and record demonstrated understanding	Draft
Answer questions outside the Agent Factory curriculum	Never
Share or expose one student's record to another	Never
Modify the governed Agent Factory knowledge base	Never

Field	What to write	Your entry
Escalation	When it stops, and whom it asks	Stops when a question falls outside the governed Agent Factory knowledge base or the student's record, when the connector or OAuth session fails, or when the learner raises a concern about their data. Escalates to Panaversity support via

Field	What to write	Your entry
		the feedback button on the Zia Tutor AI docs page.
Evaluations	The cases it must pass, and how often it is checked	Must pass: grounding every lesson in the System of Record, resuming correctly from the learner record, checking understanding before advancing, and refusing out-of-scope questions. Checked at each beta release; beta 1 is the current version.

How it runs and is reached

Field	What to write	Your entry
Channels	Where people reach it	Inside claude.ai , via the Zia Tutor AI custom connector and the uploaded skill. No separate app or interface.
Triggers	What starts its work	The student types " /zia-tutor-ai " in a new claude.ai chat. It only activates when called, so other chats stay unaffected.
Runtime needs	Surface, model and effort, with the date chosen	Surface: claude.ai . Model: Opus 5 or Sonnet 5 (selected in the model picker). Required because Zia must check the book and learner record on every reply; smaller models skip

Field	What to write	Your entry
		checks and improvise. Chosen: September 07, 2026.

Open questions

One line per question you couldn't settle, with who can answer it.

- What is the exact SLA for connector uptime and OAuth session validity during beta? — Panaversity platform team.
- Which specific student-record fields are exposed to the learner for viewing and editing, and through what interface? — Panaversity product owner.
- What is the formal evaluation rubric and cadence for the "must pass" cases beyond beta releases? — Zia Khan / Panaversity.
- Who owns incident response if a learner record is corrupted or exposed? — Panaversity support lead.
- Will the skill be versioned separately from the connector, and how are updates communicated? — Panaversity platform team.
